Choose the correct answer from a,b,c or d:

17- All of the following can be used to write an online profile
EXCEPT..... .

- a) previous work experience
- b) future dreams and ambitions
- c) current achievements
- d) mutual friends and relatives

Mohamed Sayed

Read the following passage, then choose answer from a,b,c or d:

Jennifer was thinking in her room. She wanted a shelter there since false gossip about her began circulating at the academy last week. Not that Jennifer had ever been considered a social butterfly. She preferred to live indirectly through the stories of her more unashamed friends: late night celebrating, associating with girls, childish tricks. Still, she had taken to be more by herself than usual since the accusations surfaced and that thing made her on thin ice. She was up for consideration for the highly popular Blauvelt Award, a scholarship recognizing “academic integrity and promise.

” A student had given headmaster Jack an anonymous “tip” that Jennifer had cheated on several tests. The accusations were laughable. Jennifer had long been a clever student at the academy. She lacked a natural intelligence- this was true. However, she compensated for this shortage through carefulness and insistence; she was very thorough in her studies and exhibited an almost relentless determination. Still, the accusations had given the recommendation committee pause.

On Friday Jennifer had been called to Mr. Jack grand office, where she was asked copious questions about her recent exams. The experience was quite shocking. It was an elite school. Most of its students came from honored backgrounds. This was not the case for Jennifer. Her family had little money. She attended the school on a full scholarship. The Award would help her family pay for college. So, it was with the same diligence which she applied to her studies that Jennifer planned to reveal her accuser

Read the following passage, then choose answer from a,b,c or d:

About 349 million people across 79 countries are facing acute food insecurity – up from 287 million in 2021. The global community must not fail on its promise to end hunger and malnutrition by 2030. Many innovations that were once heavily supported and publicized, such as fish-protein concentrate and protein from algae grown on petroleum substrates, have fallen by the wayside. The proposals themselves were technically feasible, but they proved to be economically unviable and to yield food products culturally unacceptable to their consumers. Recent innovations such as opaque-2 maize seems promising, but it is too early to predict its ultimate fate.

Despite having extensive governmental support, these unsuccessful innovations often have not been technologically adapted or culturally acceptable to the people for whom they had been developed. A successful new technology, therefore, must fit the entire sociocultural system in which it is to find a place. Security of crop yield, practicality of storage, taste and costs should be put in consideration. For example, the better protein quality in bread made from opaque-2 maize will be of only limited benefit to a family on the margin of subsistence if the new maize is not culturally acceptable or is more likely to be attacked by insects.

The adoption of new food technologies depends on more than these technical and cultural considerations; economic factors and governmental policies also strongly influence the ultimate success of any innovation. Some economists exaggerate in claiming that profitability is the key factor guiding technical change and disregard the substantial effects of culture. Most technological innovations in agriculture can be fully used and adopted only by large landowners in case they believe that the innovations will increase their incomes even if they harm sectors of the population and reduce the availability of food in a country.

- b. conclusion 
- c. thesis
- d. topic sentence

20) This myth is passed down from generation to generation. The antonym of the word “myth” is

- a. legend
- b. fact 
- c. tale
- d. fairy

2 Read the text and answer the questions:

In 1911, Charlie Chaplin, a penniless music-hall artist, left England from America. His future was uncertain, but he believed it couldn't be unhappier than his past. He had grown up in the slums of London. His mother's life was hard and got mad. His father died of drink. His parents hoped to be stars. Their son was determined to succeed where they had failed.

By 1914, Chaplin was famous in America. He was the king of silent movies. How did he reach the top of the film world? He began to develop the character of the tramp that is connected with his name. He borrowed ideas from many sources. HE used his bowler hat to signal secret messages and his walking stick allowed him to cause confusion and punish his enemy from a distance. He got the ideas of his famous flatfooted walk from a London taxi driver who had sore feet.

Inside the tramp's clothes, the audience saw a human being who was poor, but dreamt of being rich. The audience would be moved by this, but before they had time to reach for their handkerchiefs, Charlie's feet would get in the way and make them laugh instead. Charlie was the master of mime and as an acrobat; he used to perform dangerous stunts. In 1919, he formed his film company and wanted to write about his experiences. In "The Kid", Chaplin remembered his fear and unhappiness when separated from his mother. On a visit to Britain, the American government refused to give him a re-entry visa and he stayed in Switzerland. Aged 86, he went to Buckingham to be knighted by the queen

Choose the correct answer from a,b,c or d:

21) How did Charlie Chaplin develop the idea of a tramp?

- a. He set up his own film company and became a director.
- b. He got ideas from many sources and used his hat to convey secret messages 
- c. He remembered his sadness when he was separated from his mother.
- d. He copied the London taxi drive with sound feet.

22) The best sentence that can summarize the first paragraph is

- a. The audience got bored of Chaplin
- b. Charlie's parents were very successful
- c. Despite his poverty. Chaplin was keen on success 
- d. Charlie was the master of mime and made a fortune

Choose the correct answer from a,b,c or d:

23) According to the passage, Charlie Chaplin became famous as an actor in America

- a. in many years
- b. at the age of eighty
- c. within few years
- d. after his death

24) The best subtitle for the passage.....

- a. Charlie Chaplin and his fame
- b. Charlie Chaplin is an adventurous acrobat
- c. The American government was unfair to Charlie
- d. Charlie's parents and their sufferings

Mohamed Sayed

Choose the correct answer from a,b,c or d:

25) According to the passage, Charlie Chaplin was

- a. dependent and satisfied with his life.
- b. ashamed of himself and his works.
- c. determined and had a strong will. 
- d. unkind and ungrateful to his parents.

26) Compare between the American government and the British government.

- a. The American government allowed Charlie to be a comedian, but the British one stopped him.
- b. The American government refused to allow Charlie to be a star.
- c. The British government honoured Charlie but the American one didn't. 
- d. The American government knighted Charlie, but the British one neglected him.

Choose the correct answer from a,b,c or d:

27) If Charlie hadn't travelled to America, he

- a. would have changed his career
- b. wouldn't have gained fame 
- c. would have defeated his enemies
- d. wouldn't have been poor

28) Infer what would have happened if Charlie Chaplin had come from a rich family?

- a. He wouldn't have imitated the taxi driver with sore feet.
- b. The American government would have given him a re-entry visa.
- c. He would have been suspected for his political beliefs.
- d. He wouldn't have struggled to be successful. 

2 Read the text and answer the questions:

In many countries, rivers that cause floods have to be controlled. There are many ways of doing this including building walls along the sides of rivers so that they do not flood even when the water level rises, In some places, lakes are created next to rivers so that, when the level rises, the water runs into the lakes instead of into the streets of towns or cities, In other places, dams have been built to stop rivers flooding. The Aswan Dam is a good example of this. It has saved Egypt from floods for years.

In London, the British capital, many areas are below the level of the Thames River, which means that the city has to be protected from possible floods. To do this, a huge metal wall called the Thames Barrier was built across the river. Usually this stays open so boats can pass up the Thames to London or down the river to the sea. If the water in the river rises to a dangerous level, the wall can be raised. Between 1982, when it was finished, and 2009, the Thames Barrier was raised over 100 times. Venice in Italy has the same control system.

We usually think of floods as bad and there are many examples of floods which have destroyed towns, cities and farmland. But floods can also benefit people. In the past, for example, Nile floods made agricultural land more fertile for farmers. The lack of rich mud brought out by the floods has obliged the farmers to use increasing amounts of chemical fertilisers and chemical insecticides which surely have bad effects on both people and the soil

Choose the correct answer from a,b,c or d:

29) Floods can benefit people by

- a. destroying land
- b. making agricultural land fertile 
- c. being flown
- d. being in rivers

30) The Aswan Dam, as well as the Thames Barrier, is a

- a. wall built across a river 
- b. large lake next to a river
- c. building for boats
- d. wall built next to a river

In many countries, rivers that cause floods have to be controlled. There are many ways of doing this including building walls along the sides of rivers so that they do not flood even when the water level rises, In some places, lakes are created next to rivers so that, when the level rises, the water runs into the lakes instead of into the streets of towns or cities, In other places, dams have been built to stop rivers flooding. The Aswan Dam is a good example of this. It has saved Egypt from floods for years.

In London, the British capital, many areas are below the level of the Thames River, which means that the city has to be protected from possible floods. To do this, a huge metal wall called the Thames Barrier was built across the river. Usually this stays open so boats can pass up the Thames to London or down the river to the sea. If the water in the river rises to a dangerous level, the wall can be raised. Between 1982, when it was finished, and 2009, the Thames Barrier was raised over 100 times. Venice in Italy has the same control system.

We usually think of floods as bad and there are many examples of floods which have destroyed towns, cities and farmland. But floods can also benefit people. In the past, for example, Nile floods made agricultural land more fertile for farmers. The lack of rich mud brought out by the floods has obliged the farmers to use increasing amounts of chemical fertilisers and chemical insecticides which surely have bad effects on both people and the soil

In many countries, rivers that cause floods have to be controlled. There are many ways of doing this including building walls along the sides of rivers so that they do not flood even when the water level rises, In some places, lakes are created next to rivers so that, when the level rises, the water runs into the lakes instead of into the streets of towns or cities, In other places, dams have been built to stop rivers flooding. Choose the correct answer from a,b,c or d:

35) The Thames Barrier Is raised when

- a. the water level is low
- b. ships are sailing along the Nile
- c. the water level is high
- d. it rains heavily

36) The Aswan Dam was mentioned in the text to.....

- a. emphasize the importance of building dams
- b. show how dams tackle the problem of draught
- c. Prove that Egypt was able build dams
- d. help prevent the sea levels from rising

3 Read the sentences and choose the correct translation from A, B, C or D.

37) Magdi Yacoub, the legendary heart transplant surgeon, has been awarded many prizes locally and globally

- (a) لقد مُنح جراح القلب الأسطوري مجدى يعقوب العديد من الجوائز محلياً وعالمياً.
- (b) منح مجدى يعقوب جراح القلب المفتوح العديد من الجوائز بيئياً وعالمياً.
- (c) لقد منح مجدى يعقوب جراح القلب الأسطوري العديد من الجوائز للأطباء محلياً وعالمياً.
- (d) منح مجدى يعقوب العديد من الجوائز لجراحي القلب الأسطوريين محلياً وعالمياً.

3 Read the sentences and choose the correct translation from A, B, C or D.

38) Unity and cooperation are the necessary qualities which we need to succeed in our national projects

- (a) التعاون والتوحد هما الصفتان الضروريتان اللتان نحتاجهما للنجاح في مشروعاتنا القومية
(b) التعاون والوحدة هما الصفتان الضروريتان اللتان نحتاجهما للنجاح في مشروعاتنا الدولية.
(c) التعاون والاتحاد هما الصفتان الضروريتان اللتان نحتاجهما للنجاح في مشروعاتنا الدولية.
(d) التعاون والاتحاد هما الصفتان الضروريتان اللتان نحتاجهما للنجاح في مشروعاتنا القومي

3 Read the sentences and choose the correct translation from A, B, C or D.

39 (لا تتوقع نجاحا بدون صعوبات أو سعادة بدون ألم أو مكسبا بدون خسارة إنها الحياة اقبلها أو ارفضها لكن لتعيشها يجب أن نفهمها

- a.** Don't expect success without hardships, happiness with pain or Winning Without loss: it was life, Take it or leave it, but to live, you should understand it.
- B.** Don't expect success without hardships, happiness without pain or winning without loss; it's life. Take it or leave it, but to live it, you should understand it ✓
- c.** Don't expect success without hardships or happiness with pain or winning without lose, it's life. Take it or live it, but to live it, you should have understood it.
- d.** Don't expect success without hardships or happiness without pain and winning without loss:! It's life, take it or leave it. But, to live it, you should understood it.

3 Read the sentences and choose the correct translation from A, B, C or D.

40) تطورت الرياضة النسائية على مستوى الهواية والاحتراف دوليا ، فازدادت مشاركة النساء والفتيات في الرياضة هذه الأيام وقد حققن نجاحا كبيرا

- a.** Woman's sports have developing in amateur and professional level internationally, participation of women and girls in sport increased these days and they achieved great success.
- b.** Female sports have developing for amateur and professional levels internationally. So participating women and girls in sports increased those days to achieve great success.
- c.** Female sports developed for amateur and professional level internationally, So participating women and girls in sports has increased today so that they will achieve great success.
- d.** Women's sports have developed in amateur and professional levels internationally; participation of women and girls in sports has increased these days and they achieved great success 

English

Choose the correct answer from a,b,c or d:

Q1:He is praised by everyone because he has faced many.....during his journey to success.

A respects B chances C challenges D prohibitions

Q2:His previous experience made him the best.....for the job. He got chosen.

A employer B voter C interviewer D candidate

Q3:I can't agree with her. Her decisions are often based on sense, not critical thinking.

A strange B popular C common D dull

Q4:The Eiffel Tower is one of the most popularin Paris. You have to visit it if you go there one day.

A landfills B landlords C landscapes D landmarks

Choose the correct answer from a,b,c or d:

Q5:He is..... . He can speak both of English and French languages fluently.

- A bilingual B trilingual C singular D monolingual

Q6:Thefirefighter rescued the kids in the burning building.

- A brave B idle C lazy D coward

Hello, I am Jake. I have returned to my hometown of Wilson Creek after an absence of 10 years. So many things have changed around here. When I left Wilson Creek, there was a small pond on the right as you left town. They have filled in this pond and they have built a large shopping mall there. A new post office has also been built just across from my old school. There is a baseball stadium on the outskirts of Wilson Creek which has been changed completely. They have now added a new stand where probably a few thousand people could sit. It looks really great. The biggest changes have taken place in the downtown area. They have pedestrianised the centre and you can't drive there anymore. A European-style fountain has been built and some benches have also been added along with a grassy area and a new street cafe. My street looks just the same as it always has but a public library has been built in the next street along. There used to be a great park there but they have cut down all the trees which is a pity. The library now has a large green area in front of it but it's not the same as when the park was there. Another improvement is the number of new restaurants that have opened in Wilson Creek. A Chinese and an Italian restaurant have opened in the town centre and a Mexican restaurant has opened near my home. Which is where I am going tonight!

OB Read the following passage, then answer the questions :

Everybody likes to feel that she or he is special. Sadly, many of us grow up believing that we're not special at all. We wish that we could be more attractive or better at sports. We wish we had more money or more beautiful clothes. Like the Tin Man, the Scarecrow, or the Cowardly Lion from The Wizard of Oz, we think we're not good enough just as we are. In the film, The Tin Man wishes he had a heart. The Scarecrow wishes that he had a brain, and the Lion wants courage. Eventually, each of them realizes that he already has what he wants. Nearly all parents want us to be the best we can be. They occasionally attempt to encourage us to do better by comparing us to others. They mean well, but the message we usually get is that we're not good enough. We start to believe that the only way we can be special is by being better than somebody else, but we are frequently disappointed. There will always be somebody out there that is better than we are at something. There are a lot of people around who may not be as intelligent as we are, but who are better at sports. Or they may not be as handsome, but they have more money. It is unthinkable for us to be better than everybody else all the time. Like the Tin Man, the Scarecrow, and the Cowardly Lion, we all need what we believe will make us better people. Our parents often forget to tell us that we are special, that we are good enough just as we are. Either way, it's up to us to remind them sometimes that each of us, in our own way, is special

Q19: The sentence that gives the reader some examples or evidence in the paragraph is called.....

- Ⓐ a topic sentence
- Ⓑ introduction
- Ⓒ conclusion
- Ⓓ a supporting sentence

Choose the correct answer from a,b,c or d:

Q20: When we start writing, we shouldn't _____

- Ⓐ think about the grammar that will be included
- Ⓑ think about different topic if we know more about it 
- Ⓒ write everything we know about the topic
- Ⓓ think about the ideas we will write about

Mohammed Sayed

OB Read the following passage, then answer the questions :

Many people have jobs that are not very interesting, but a lot of people have to work at night, and this is very difficult. When everybody else is getting ready to go out, they have to go to work, and this puts a lot of psychological stress on them. It is also not very healthy because the human body is designed to be active in the day and to rest in the dark. If this cycle is reversed it can have a bad effect on a person's health. So, why do people do night shift? Nowadays many business have to offer a 24 hour service, like hotels, delivery companies, some supermarkets open all night and all day, call centres and hospitals. It is true that some people only need a few hours sleep at night but the majority need eight hours. Humans are most active in the middle of the day, and the time when they are least able to concentrate and be efficient is between 2am and 4 am. This is the worst time to drive, or to do anything that needs concentration. The body finds it very difficult to adapt to the opposite cycle. Things are not likely to get better in the future because more and more business are working 24 hour cycles to keep in step with our 24 hour society.

Many people have jobs that are not very interesting, but a lot of people have to work at night, and this is very difficult. When everybody else is getting ready to go out, they have to go to work, and this puts a lot of psychological stress on them. It is also not very healthy because the human body is designed to be active in the day and to rest in the dark. If this cycle is reversed it can have a bad effect on a person's health. So, why do people do night shift? Nowadays many business have to offer a 24 hour service, like hotels, delivery companies, some supermarkets open all night and all day, call centres and hospitals. It is true that some people only need a few hours sleep at night but the majority need eight hours. Humans are most active in the middle of the day, and the time when they are least able to concentrate and be efficient is between 2am and 4 am. This is the worst time to drive, or to do anything that needs concentration. The body finds it very difficult to adapt to the opposite cycle. Things are not likely to get better in the future because more and more business are working 24 hour cycles to keep in step with our 24 hour society.

OB Read the following passage, then answer the questions :

A month ago I had no idea that on Sunday afternoon in July I'd be 50 metres above the ground and enjoying it. Now I looked down at the river far below me, and realised why people love rock climbing. My friend Jane and I had arrived at the Activity Centre on Saturday evening. The accommodation wasn't great, but we had everything we need; beds, blankets and some food plus we were pleased to be out of the city and in the fresh air. On Sunday morning we met the other ten members of our groups. James had come along with two friends, Harry and George, while sisters Maria and Sara had come with Isabella. We had come from many different places, so none of us knew the area. We knew we were going to spend some time outdoors, but none of us was sure exactly how. Half of us spent the morning caving while the others went rock-climbing and then we changed at lunchtime. Jane and I went to the caves first. Climbing out was harder than going in, but after a good deal of pushing, we went out at last - covered in mud, but pleased and excited by what I'd done

You're hiking with a friend and then as you step over a tree log a snake beneath bites your leg. One thought races through your mind, 'If you get bitten by a snake, suck out the venom.' Terrified, you turn to your friend, but he replies, 'No way! Then we'll both die.' Is he right? Most likely, your friend wouldn't die. But if he has an open wound in his mouth, the venom could enter his bloodstream, which is no help to either of you. So, venom sucking isn't a solution. To understand how to treat snakebites, you need to know the difference between poisons and venoms. Poisons are toxic, in other words dangerous, if you swallow or smell them. Venoms, on the other hand, are only toxic if they get into soft tissues and the bloodstream. So, if you suck the venom out of a snake bite, you won't be affected. But that doesn't mean you should do it! Experts now strongly advise against it. Why? Venom enters the bloodstream extremely quickly, and trying to suck it out is ineffective because it's faster than your reaction. The best way to prevent the venom from quickly moving through the bloodstream is to remain calm, and avoid doing anything that would increase the heart rate. So what else should we do? Well, be aware of what snakes are in the place you are walking in. That way you will have an idea which ones are dangerous.

OB Read the following passage, then answer the questions :

People often ask me who I have to thank for my success as a pianist and songwriter. They expect to hear that I was born into a musical family and had an excellent piano teacher. However, the truth is different. When I was little, nobody played an instrument at home. I learnt to play the piano and sing because there was a piano in my house and I just wanted to make music. My parents allowed me to sit at the piano and sing for as long as I wanted. If they were afraid that I would break the old piano, they never mentioned it. They didn't suggest that I should take lessons, either. The songs just came to me when I had my hands on the piano. I suppose I had musical talent and that is all you need. I started writing proper songs when I was a teenager. The music was mine, but the words were from other song writers. It seems so easy. When you start to compose, you do that, you copy other people's best songs. Then you start changing the melodies and the words and you develop your own style. That only happened later, when I had grown beyond my teenage years. For a time, I thought music would be just a hobby. My parents had developed a strong belief that I would be able to make a living as a musician, but I had my doubts, so after school I took a job in radio and advertising. Then one day one of my songs won a prize and that changed everything. I realized my happiness was in music. I have been a musician ever since that day.

- A Cell phone use while driving is very dangerous.
- B People tend to drive faster when they are talking on cell phone
- C Drivers aren't aware of surrounding traffic when they are using a cell phone
- D Cell phone cause drivers to take their eyes off the road .

OB Read the sentences and choose the correct translation from A, B, C or D.

My name's Mark Porter. I've been interested in the natural world since I was very young. I used to keep insects, and I spent a lot of time drawing them. After I finished school, I went to work in a pet shop - that was great fun, but I knew I had to go to college if I wanted a better job. So I went to university to study Biology and then got a job in Florida working at a sea-life centre, looking after the dolphins. While I was working there, I saw an advertisement for my current job - a keeper for the fish department at a zoo in California - and applied. Although it was for the same money, I was pleased when they immediately offered me the job because there are lots of different activities I'm involved in here. As part of my job, I get to do research, and I manage an education centre where I tell people of all ages about what they can do to protect fish and animals. People think that my job is exciting because I go diving as part of my research work on sharks. However, I work long hours, and I worry if I have to call a medical specialist to come and look after a sick fish. Conditions at work can be uncomfortable too, as a lot of the fish I look after bite, so I have to be careful. Then there are the visitors. Some are OK, but some try to touch the fish or put sweet wrappers in the water - that makes me angry. However, my job is very rewarding, and I hope that you'll think about working with animals, too

OB Read the following passage, then answer the questions :

'If when you hear the words "international athlete", you imagine a runner in an exotic location, enjoying life in a five-star hotel, think again. I won the Dublin Marathon and the European Games and I now want to win a place in the Olympic Games. I also have a demanding job and a family life to organize. My life is exciting, but I don't live in luxury. I am Sarah Radford. My route to the top was not what you might expect. I ran until I was sixteen, then went to college and got married. At 25 I made a come-back. That year my daughter was four and although fitting in a full-time job, family and running was not easy, I was managing it all fine. Then I had to stop when I hurt my left knee while running. I started back again a year later, and I'm now running really well. I am pleased that I am now performing at a high-level, but I know that if I make it to the Olympic team there will be more training to do. I may have to decide to work only part-time then, until midday, and get somebody to help with the housework. You have to take an opportunity to compete in the Olympics when it comes because you don't know if it will ever come again. For the moment, though, training has to fit around everything else in my life. I usually run into work, nearly eight miles along a main road, in my running shoes and tracksuit. Then I quickly change into my work uniform – my employers are used to that! They are also understanding about the demands of life as an athlete, which means I do not work weekends because of races.'

Q20: “ I agree that modern technology has made our lives better in many ways.” This sentence be included in an article as a _____

- Ⓐ thesis statement
- Ⓑ supporting sentence
- Ⓒ topic sentence
- Ⓓ concluding sentence

OB Read the following passage, then answer the questions :

First of all, what is a yeti? Himalayan people say there are two sorts of yeti. Both are big — about two meters high — and both can walk on two legs. One (the smaller yeti) eats humans!!! But the larger yeti prefers yaks (similar to big black hairy cows). The yeti doesn't live in the snow, but in the thick Himalayan Forest. It goes to snowy regions to eat a plant which contains salt. That is the legend. It is easy to say that the yeti is no more than a legend. However, people have discovered other evidence. In 1951, British mountaineers found footprints in the snow on Mount Everest, at a height of 6000 meters. These footprints were about 28 cm. long. They showed five toes. The footprints were made by a large creature, weighing at least 100 kilograms. No human or animal has footprints like these. So, what is a yeti — if it exists? Some people think it is like a «Gigantopithecus», a prehistoric animal that lived in China and India about half a million years ago. Did this animal go into the mountains, when man appeared? We still do not know the answer.

OB Read the following passage, then answer the questions :

Chris Bonnington's expedition did not find a yeti; but one member of the group thought he saw one. The expedition found some large footprints in the snow. Then they found the skins of two sheep. Someone — or something — had killed the sheep, then skinned them very well, with a tool. And one day, the expedition lost two pairs of ski poles. They had left the poles under a rock. When they returned, the poles weren't there! No-one else was in that part of the mountains. Indeed, no-one else had visited that region this year. So, who had taken the poles? A yeti? Is this enough to prove that the yeti exists?

That is the legend. It is easy to say that the yeti is no more than a legend. However, people have discovered other evidence. In 1951, British mountaineers found footprints in the snow on Mount Everest, at a height of 6000 meters. These footprints were about 28 cm. long. They showed five toes. The footprints were made by a large creature, weighing at least 100 kilograms. No human or animal has footprints like these. So, what is a yeti — if it exists? Some people think it is like a «Gigantopithecus», a prehistoric animal that lived in China and India about half a million years ago. Did this animal go into the mountains, when man appeared? We still do not know the answer. Chris Bonnington's expedition did not find a yeti; but one member of the group thought he saw one. The expedition found some large footprints in the snow. Then they found the skins of two sheep. Someone — or something — had killed the sheep, then skinned them very well, with a tool. And one day, the expedition lost two pairs of ski poles. They had left the poles under a rock. When they returned, the poles weren't there! No-one else was in that part of the mountains. Indeed, no-one else had visited that region this year. So, who had taken the poles? A yeti? Is this enough to prove that the yeti exists?

OB Read the following passage, then answer the questions :

Here is the car of the future! This car is the opposite of today's cars; today's cars are noisy and dirty; this one is silent and clean. Today's cars have wheels, this one does not. It moves like a snail, but much faster than a snail! This car will use electric energy, not petrol or gasoline; it will have batteries that can be recharged instantly from chargers in the road. It will also be very easy to drive. In fact, you won't need to drive it; it will drive itself. You will just need to tell the computer: "Go to X" and the car will go there. Also, it will reach X very quickly, much faster than today's cars. It will also be very safe and comfortable. A lot of the technology already exists, but it is very experimental. Already today scientists are developing new materials for the surface of roads: In fifty years from now, perhaps sooner, some new roads will capture solar energy: they will store this energy under the road, and some cars will be able to use it. However, you probably won't ever drive a "snail car", even if you're under 20 today. This, perhaps, is the car of the year 2100, the car that your grandchildren will maybe drive. Driving will be nice in the 22nd century! No pollution, no traffic-jams, no stress. If, of course, we reach the 22nd century.... With all today's problems of global warming, pollution, viruses and natural resources, nothing is certain any more. Scientists have lots of ideas about the car of the future: but the future itself is perhaps less sure.

- c. The children got used to living in there new flat.
- d. The children got used to living in their new flat. 

20. We type the topic of the email in the.....line.

- a. To
- b. From
- c. Subject 
- d. conclusion

Read the following passage, then choose the correct answer from a, b, c or d :

Most countries in the world have an agreement with foreign countries that allows their ambassadors to live and work there. The job of an ambassador is to look after the citizens and business interests of the country which he or she represents.

This is just one of many international agreements and treaties between countries. Some of these treaties have been designed to help trade between countries. For example, countries in the European Union have an agreement that means citizens of any member country needn't have a permit to work in any other country in the Union. Businesses can employ people and sell products to any other member of the treaty.

Some treaties help countries in other ways. For example, the Arab League helps various Arabic-speaking countries towards economic, political, cultural and scientific cooperation.

Treaties are not new, however. The world's first ever treaty is believed to be the Kadesh Peace Treaty, signed by the Egyptian Pharaoh Ramses II and the Hittite king of an area which is now part of modern Turkey. The treaty of 1258 BCE agreed to end a war that had lasted for many years. A copy of the treaty can be seen in today's United Nations building.

This is appropriate for an organisation which has 193 countries. To be part of the United Nations, each of these countries had to sign a treaty that agrees to promote peace and development around the world.

Read the following passage, then choose the correct answer from a, b, c or d :

In a small village, there lived a little girl whose name was Sophia. her uncle gave her a few of pennies to share with her twin brother John in their fifth birthday. She looked at the pieces and said, "What shall we do with them, mother?" "You mustn't spend them foolishly." said their mother. ne twins ran into the street. they wondered what they should buy. Should they buy candy? **"They hardly knew how it tasted"**. Should they buy a toy? If they had been the only children in the family, things might have been different. But there were three boys older than them and two little younger sisters. they hadn't gone far when they met a larger boy who was blowing a flute. "I wish I had that flute," John said. The big boy looked at them and blew it again. Oh, what a pretty sound it made!" Sophia showed the money to the boy. "You may have them if you will give us the flute." "All of them?" the boy asked. She looked at her brother then nodded. "Well, it's a deal", said the boy, and he gave the flute to the boy and took the pennies. Little John was very happy. They ran home quickly. "You've paid a dear price for this thing. You might have bought half a dozen of such flutes with the money" said his mother. Ille twins saw what a mistake they had made. the flute did not please John anymore. He threw it upon the floor and began to cry. "Never mind", said the mother very kindly. "You are only very little, and you will learn a great deal as you grow bigger".

a. haven 't found

b. hadn't found

c. haven't been found 

d. didn't find

16. How did our grandparents.....without mobiles?

a. used to living

b. got used to live

c. used to live

d. use to live 

Mohamed Sayed

Choose the correct answer from a,b,c or d:

Many modern inventions affect our life greatly. But, we don't know how they were made or who invented them? The inventors of the first airplane were not scientists. They were just ordinary brothers, with a big dream of flying. Wilbur and Orville Wright grew up in Indiana in a large family. Neither of the brothers finished high school. Instead of sitting in class and reading, they wanted to work and make things, like machines. When the brothers were 18 and 22 years old, they started up their own printing press and bicycle shop. One day, Wilbur read an interesting story in the newspaper about a man trying to fly in a glider. The man died, but the story gave Wilbur an idea. He decided to teach himself about flying in order to make the perfect glider. Together, Orville and Wilbur successfully tested their new glider on the beach. Then the brothers decided to make their glider into a flying machine. They put an engine and propeller on the glider and called their new machine the "Wright Flyer." The plane broke down on its first test, but the Wright brothers didn't give up. With a little more hard work, the Wright Flyer made a successful flight! On December 17, 1903, the Wright brothers made history by flying the Wright Flyer over the beach at Kitty Hawk, North Carolina. The airplane was born.

At school, you have probably had the support of your teachers, your family and your friends. When you leave secondary school, you will start to have responsibility for your own life. This means being in control of your time and also your choice of career. However, it is important never to forget the values and morals that your family and your school have taught you. Show respect to older people, but also to your work colleagues, both male and female. Remember to be tolerant of people who are different to you. Be loyal to all your friends. When you are at work, make sure that you help and support your work colleagues. It is good to be ambitious, but do not envy people who are promoted before you. Be patient and always work hard, and you will be rewarded one day. When you are not at work, spend some helping your local community. This is an excellent way to meet new people, and to help improve the lives of others. Try to help the poor whenever you can. Most people find that voluntary and charitable work is so rewarding that they are happy to do it. Your school has taught you how to pass your exams, but it has also taught you important values and morals that will help whatever career you choose.

Choose the correct answer from a b c or d.

20. A/An.....essay often requires research.

- a. persuasive
- b. descriptive
- c. expository 
- d. narrative

Mohamed Sayed

Choose the correct answer from a,b,c or d:

What is the future of medicine? Many people believe that technology will be used a lot more to help people in the future. Technology has already been used in medicine for many years. A pacemaker is a small device that can help people with heart problems. People can have them put into their chests to help them to beat regularly. Small devices can also be put into people's ears. They are connected to the brain and help deaf people to hear. Many complex operations are also being done using technology. These devices have cameras that help the surgeon to see parts of the body that are very small, and they help to reduce the amount of the body that has to be cut in an operation. This helps the patient to recover more quickly. People who have lost an arm or a leg can also use modern technology. They can have an electronic leg or arm, which can be moved like a normal limb. In the future, more electronic parts of the body might be made in this way. Soon it is believed that tiny robots, which are small than a millimetre across, will be injected inside people's bodies. Medicines can then be carried by the robots to the parts of the body that need them, so there will be fewer side effects. Robots are also being used to clean hospital rooms. They are very **efficient** at killing germs and they help to reduce infections. Other robots are used in hospitals to mix medicines or to carry heavy patients who cannot walk. They may not look like human doctors or nurses, but one day we will probably be used to seeing robots in our hospitals.

Choose the correct answer from a,b,c or d:

Golf is a club-and-ball sport in which players use various clubs to hit into a series of holes on a course in as few strokes as possible. Unlike most ball games, golf cannot and doesn't utilize a standard playing area. The game at the usual level is played on a course with an arranged progression of 18 holes through recreational courses that can be smaller, often having nine holes. Tiger Woods started playing golf when he was two years old. Now, he is one of the most famous professional golfers in the world. Tiger is from the United States. His father is African-American and his mother is Thai. His real name is Eldrick, but everyone knows him as Tiger, the nickname his father gave him. He started playing golf professionally in 1996, and won all four of the World Golf Championships before he turned 25. He **holds the record** as the youngest player ever to win all four of these championships. Although he has played on many great golf courses, one of Tiger's favorite places to play is Pebble Beach. Tiger became a role model at an early age. People look up to him, so he is very grateful. Because many people helped Tiger as a child, he wants to lend a hand to others now. Some people cannot play golf because of their ethnicity, while others do not have enough money. Occasionally, Tiger himself was prevented from playing golf. Because of this, he created the Tiger Woods Foundation to help make golf open to everyone. He likes to see diversity on the golf course, and he wants all children to play golf if they want to. Tiger is happy that many children now want to play golf because of him.

He started playing golf professionally in 1996, and won all four of the World Golf Championships before he turned 25. He **holds the record** as the youngest player ever to win all four of these championships. Although he has played on many great golf courses, one of Tiger's favorite places to play is Pebble Beach. Tiger became a role model at an early age. People look up to him, so he is very grateful. Because many people helped Tiger as a child, he wants to lend a hand to others now. Some people cannot play golf because of their ethnicity, while others do not have enough money. Occasionally, Tiger himself was prevented from playing golf. Because of this, he created the Tiger Woods Foundation to help make golf open to everyone. He likes to see diversity on the golf course, and he wants all children to play golf if they want to. Tiger is happy that many children now want to play golf because of him.

hide

Golf is a club-and-ball sport in which players use various clubs to hit into a series of holes on a course in as few strokes as possible. Unlike most ball games, golf cannot and doesn't utilize a standard playing area. The game at the usual level is played on a course with an arranged progression of 18 holes through recreational courses that can be smaller, often having nine holes. Tiger Woods started playing golf when he was two years old. Now, he is one of the most famous professional golfers in the world. Tiger is from the United States. His father is African-American and his mother is Thai. His real name is Eldrick, but everyone knows him as Tiger, the nickname his father gave him. He started playing golf professionally in 1996, and won all four of the World Golf Championships before he turned 25. He **holds the record** as the youngest player ever to win all four of these championships. Although he has played on many great golf courses, one of Tiger's favorite places to play is Pebble Beach. Read the following passage, then answer the questions:

Once upon a time, there was a boy who became bored when he watched over his village sheep grazing on the hillside. To entertain himself, he shouted, "Wolf! Wolf! The wolf is chasing the sheep!"

"! When the villagers heard the cry, they came running up the hill to drive the wolf away. But, when they arrived, they saw no wolf. The boy was amused when he saw their angry faces.

"Don't scream wolf, boy," warned the villagers, "when there is no wolf " They angrily went back down the hill.

Later, the little sheep herder cried out once again, ""Wolf! Wolf! The wolf is chasing the sheep!" To his amusement, he looked on as the villagers came running up the hill to scare the wolf away.

As they saw there was no wolf, they said strictly, "save your frightened cry for when there is a real wolf! Don't cry 'wolf' when there is no wolf!" But the boy grinned at their words while they walked grumbling down the hill once more.

After a while, the boy saw a real wolf sneaking around his flock. Alarmed, he jumped on ! his feet and cried out as loud as he could, "Wolf! Wolf!" But the villagers thought he was fooling them again, and so they didn't come to help.

At sunset, the villagers went looking for the boy who hadn't returned with their sheep. When they went up the hill, they found him weeping. "There really was a wolf here! The flock is gone! I cried out, "Wolf!" but you didn't come, "he wailed.

Read the following passage, then answer the questions:

Asthma has a long history of evolution before it was categorically defined. The earliest mention of respiratory distress and wheezing was found in 2600 BC in China. It was treated by herbs till 1950s when some tablets 200 adrenaline injections were invented.

Asthma is an inflammatory disease of the airways of the lungs. It is characterized by variable and recurring symptoms, reversible airflow obstruction with normal temperatures.

It is one of the most common diseases of children, but adults can have asthma, too. Asthma causes wheezing, breathlessness, chest tightness and coughing at night or early in the morning.

Genetic, environmental are occupational factors are main causes for asthma. If you have asthma, you will suffer from it all the time. You will have asthma attacks only when something bothers your lungs. The attack happens in your body's airways, which are the paths that carry air to your lungs. As the air moves through your lungs, the airways become smaller. During an asthma attack, less air gets in and out of your lungs.

People can control asthma by avoiding some things that may lead to it or what we can call "asthma triggers".They are different from someone to another, but there are some common ones as tobacco smoke, dust mites, outdoor air pollution, pets, mold, smoke from burning wood or grass, and infections like flu. Asthma can be treated by breathing some medicines or taking some pills according to the doctor's advice.

The effect of these two ways of medication can be either to have a quick-relief control to ease the symptoms of an asthma attack or to have a long control to have fewer and milder ' attacks.

23. According to the passage, asthma is/an disease.

- a) blood b) chronic ✓ c) accidental d) heart

24. Which of the following sentences can summarize the first paragraph?

- a) Asthma is a deadly disease that can't be treated.
